What is chariot Corp Limited doing with Black Mountain lithium?

Sign up to get your Chariot Corp Limited shifts strategy for Black Mountain lithium project in Wyoming, focusing on a Pilot Mine to supply spodumene concentrate to US refineries.

Did chariot find lithium in Wyoming?

Chariot corporation limited (Chariot) recently announced the first discovery of hard rock lithium in Wyoming, US. The initial results from the Company's first three drill holes at its flagship Black Mountain project had assays returning individual lithium (Li) and tantalum (Ta) values of up to 3.79% Li₂O and 230 ppm Ta₂O₅.

Is chariot a lithium miner?

It is a product seen as critical for electric vehicle (EV) production and the many lithium hydroxide refineries under construction in the nation's south-west. Chariot Corporation has switched its strategy to become a near-term hard-rock lithium miner at its Black Mountain project in Wyoming.

Does Black Mountain have a mineral lease agreement?

Having conducted a comprehensive assessment of mineral resources, Black Mountain is actively seeking mineral lease agreements for our lithium project. We are thrilled to connect with landowners as we embark on our latest frontier in exploration.

Where did chariot find lithium?

Chariot has intersected significant zones of strong lithium-tantalum mineralisation in the first three holes of the maiden drill programme at Black Mountain. This is the first hard rock lithium discovery, through drilling, in Wyoming, US.

Who is Black Mountain Energy Storage?

Leveraging cumulative decades of electric market experience, Black Mountain Energy Storage develops powerful, flexible, and strategically placed battery energy storage projects to foster a resilient electric grid. BMES' quickly expanding team of energy experts are fast actors in pipeline development of utility-scale energy storage solutions.
