Does Romania offer a subsidy for battery energy storage systems?

From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday. Bids will be accepted until January 17, 2025.

How much will Romania pay for a battery energy storage system?

Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million). With the funding secured from the Modernization Fund, the Ministry of Energy launched the competitive bidding call on Tuesday. Bids will be accepted until January 17, 2025.

Does Romania have a grant program for battery energy storage systems?

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, solar, or hydro. From ESS News Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR150 million (\$158 million).

Will Romania reopen a call to support battery storage projects?

Romania's Ministry of Energy has reopened its call to support projects of battery storage for renewable energy integration, seeking at least 240 MW and 480 MWh of resources. The original call, which referred to at least 620 MWh, was expected to see projects selected by the end of 2023, according to reports.

Does Romania have a solar PV market?

Our sister site PV Tech has covered Romania's solar PV market extensively. The Ministry also announced a EUR199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with EUR149.25 million for new battery production, assembly and recycling facilities.

Will Romania support the construction of electricity storage facilities?

Following the positive assessment of the Romanian Recovery and Resilience Plan, the Commission has approved a EUR103 million Romanian scheme to support the construction of electricity storage facilities.

The Romanian Ministry of Energy launched a grant program funded by the Modernization Fund. It offers EUR150 million to support building battery storage systems ...

Bucharest PV Energy Storage Subsidy

Aurora Energy Research foresees double digit internal rates of return for standalone battery energy storage (BESS) projects entering the market as early as 2026, ...

In the wake of the publication of the EU Market Outlook for Solar Power 2023-2027, it is worth taking a closer look at Eastern Europe, a region that has demonstrated ...

The Ministry made its announcement yesterday (8 February), aiming to get the 2-hour duration battery energy storage system (BESS) ...

As the photovoltaic (PV) industry continues to evolve, advancements in Bucharest energy storage project subsidy policy have become critical to optimizing the utilization of renewable energy ...

Romania has launched a new subsidy scheme for behind-the-meter battery energy storage systems to the tune of EUR 150 million (\$158 million). With the funding ...

Romania is on track for record solar deployment in 2025, driven by subsidies for residential and commercial and industrial systems and a more favorable framework for utility ...

Romania aims to have at least 2.5 GW of battery energy storage systems (BESS) in operation by next year and to surpass 5 GW of capacity by ...

subsidy scheme will contribute to Romania's energy transition objectives by developing at least 240 MW/480 MWh. At this point, Romania's installed BESS capacity is negligible. The largest ...

On the cusp of a major renewables overhaul. Romania's new wind and solar subsidy auctions could revitalize the country's renewable energy ...

Bulgaria and Romania have revealed the results of EU-backed tenders for renewables and energy storage, with gigawatts of storage winning.

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via the National Recovery and ...

In 2022, Romanian Ministry of Energy launched a state aid scheme supporting of investments in building manufacturing capacity for production, assembly and recycling of ...

Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 ...

A solar project from developer Econergy in Romania. The country's solar sector is set to grow substantially, which will help the battery ...
