Can you carry a lithium battery with a power tool?

Lithium batteries installed in power tools can be packed in checked luggage, though spare lithium batteries must be carried on. Before traveling with your power tools, it's best to check with your airline and/or the TSA for up-to-date information on transporting them by plane.

Can you take battery-powered tools on a plane?

Now comes the answer. Yes, you can take battery-powered tools on a plane, but there are specific regulations regarding the batteries that power these tools. Most battery-powered tools use lithium-ion batteries, and the Federal Aviation Administration (FAA) has strict rules on how these batteries can be transported to ensure safety.

What if you can't remove lithium batteries from a power tool?

If passengers cannot remove the lithium batteries from their power tools, they may pack the battery and device in their checked bags, but any spare lithium batteries must be carried on. For example, passengers traveling with a power drill and two rechargeable lithium batteries must pack the drill with one battery installed in their checked bag.

What if a power tool battery is not in carry-on luggage?

If your power tool battery is larger than 100 Wh or 160 Wh, you will need to pack it in your checked luggage. You will also need to declare the battery to the airline at check-in. What if my power tool battery is not in carry-on luggage?

Are power tools allowed in checked luggage?

Gas and battery-powered tools are permitted in checked bags, but it's important to check gas-powered tools for residue, as this may be considered hazardous. Lithium batteries installed in power tools can be packed in checked luggage, though spare lithium batteries must be carried on.

What are the restrictions on power tool batteries?

The following restrictions apply to power tool batteries: Lithium-ion batteries must be under 100 watt-hours (Wh). Lithium-polymer batteries must be under 160 Wh. Batteries must be in carry-on luggage. Batteries must be protected from short circuits. Batteries must be removed from power tools.
