What is a containerised generator set?

On a regular basis, containerised generator sets (CGS) are placed on board ships to provide replacement power in case of a damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers. There are currently no clear rules and requirements for such time limited installations.

Does a generator need a permit to treat hazardous waste?

Of course, no permitting would be required if a generator chooses to treat their hazardous waste in the generator's accumulation tanks or containers in conformance with the requirements of ? 262.34 and Subparts J or I of Part 265.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

Where can I find the hazardous waste generator regulations compendium?

The Compendium has been divided into multiple volumes that are available here:

Does a generator receive waste from another generator facility?

Wastes Received From Very Small Quantity Generators 1. Does the generator receive waste from another generator facility? ?Yes ?No, continue to APPENDIX 1-6.C.8 2. If yes, is the facility from which the waste was received also under control of the operator of this LQG? 3.

Is there a Citation for a hazardous waste generator?

Please note that the Hazardous Waste Generator Improvements rule of 2016 created new sections in Part 262, which contains the regulations pertaining to generators. Accordingly, some citations in the generator requirements in older resources in this Compendium are outdated, including references to ? 261.5, ? 262.34, and others.
