Will Poland lead Eastern Europe's battery storage market?

Poland is set to lead Eastern Europe's battery storage market, with 9GW offered grid connections and 16GW in the capacity auctions.

When is the Energy Storage Summit Central Eastern Europe?

The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present.

How big is Europe's energy storage capacity in 2024?

This report highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024. In 2024, EASE has been instrumental in shaping policies for the evolving energy storage sector.

What is the European energy inventory storage dataset based on?

Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or input provided by the EC or any of its authorised 3rd party contributor

Who is Polskie Sieci Elektroenergetyczne (PSE)?

A substation run by Polskie Sieci Elektroenergetyczne, or PSE, Poland's transmission system operator (TSO). Image: Polskie Sieci Elektroenergetyczne Poland looks set to lead battery storage deployments in Eastern Europe, with 9GW of battery storage projects offered grid connections and 16GW registered for the ongoing capacity market auction.

How many projects in Poland have received a grid connection offer?

As of October 2023, around 9GW of projects have received grid connection offers from Poland's Transmission System Operator PSE. Only 6 projects with a total capacity of around 1.5GW, have agreed on the proposed terms with the TSO, with an expected connection date post-2027.

Maintaining a varied approach for solar and storage projects could add a valuable aspect of flexibility, according to panelists at LSSCEE.

The CESEC High-Level Group coordinates efforts to facilitate cross-border and trans-European energy

infrastructure projects in central ...

LSP Renewables commends the recent announcement by DTEK, which has secured UAH 3 billion (EUR67 million) in financing from a consortium of Ukrainian banks to construct one ...

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household ...

SERMATEC, recognized by BloombergNEF, finalizes an energy storage project in Eastern Europe with the EasyCube Series 372kWh system.

DTEK secures a \$72M loan to build one of Eastern Europe's largest battery storage facilities, boosting Ukraine's energy resilience and independence.

The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they ...

The Central and Eastern European (CEE) region is undergoing a critical shift towards renewable energy, driven by both the ambitious EU climate targets (net-zero ...

The European Commission has given the go-ahead to a scheme in the Czech Republic that will support 1.5GWh of energy storage projects.

Speakers at LSSCEE 2024 discussed key topics for the Eastern European solar sector, including storage, private investment and risk ...

Sunotec says it will deploy Sungrow battery energy storage system (BESS) tech across co-located solar projects in Bulgaria and wider Europe.

In the European energy storage market, Eastern European countries started later than their Western European counterparts. In ...

As renewable energy adoption accelerates across Eastern Europe, advanced energy storage solutions are becoming the backbone of modern power systems. This article explores how ...

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far "pumped hydro" storage, but ...

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. ...
