How much does Port Moresby power station cost?

The Project is designed to be capable of staged expansion to approximately 175 MW with the cost for the initial 58 MW plant being ~US\$100 million. This investment is underpinned by a long term Power Purchase Agreement (PPA) with PNG Power Limited. The Port Moresby Power Station during construction in October 2018.

What is a Bess energy storage system?

We offer energy storage systems of 50kWh~1MWh, used for commercial and industrial applications. BESS provides a wide range of technical, economic, and environmental benefits, making it a key enabler of the transition to a cleaner, more resilient, and efficient energy system.

What is a battery energy storage system (BESS)?

BESS (Battery Energy Storage System) is a technology that stores electrical energy in batteries and releases it when needed. It is widely used in power grids, commercial and industrial facilities, and even homes to improve energy efficiency, reduce costs, and enhance power reliability.

How much does Bess cost?

The cost of BESS has fallen significantly over the past decade, with more precipitous drops in recent years: This is nearly a 70% reduction in three years, owing to falling battery pack prices (now as low as \$60-70/kWh in China), increased deployment, and improved efficiency.

What is Bess & why is it important?

BESS plays a critical role in modern energy systems, enabling the transition to cleaner energy and smarter grids. It offers energy ranging from 50kWh to 1MWh and covers most of the commercial and industrial application scenarios, such as load shifting, renewable clipping, and back-up power, etc.
