How many hydrogen refueling stations will Shanghai have by 2025?

Shanghai recently released the roadmap for the growth of its hydrogen energy industry. According to the "Shanghai Hydrogen Energy Industry Development Medium and Long-term Plan (2022-2035)" issued by the Shanghai Municipal Development and Reform Commission, the city intends to establish around 70 hydrogen refueling stations by 2025.

How many hydrogen refueling stations are there?

The zone has established four hydrogen refueling stations and deployed nearly 300 hydrogen fuel cell vehicles, forming an initial industrial and innovation chain that spans from basic components to fuel cells, complete vehicles, and demonstration operations.

How will China's hydrogen refueling plant be able to achieve 50 billion yuan?

By 2030, the park aims to achieve a total investment scale of 10 billion yuan, attract 30 hydrogen energy enterprises, facilitate the listing of three hydrogen energy companies, build five new hydrogen refueling stations, deploy 3,000 hydrogen demonstration operation vehicles, and achieve a total revenue of 50 billion yuan.

Where can I find hydrogen fueling station locations?

Visit the Alternative Fuels Data Center to find hydrogen fueling station locations in the United States. The following publications provide more information about NREL's hydrogen fueling infrastructure analysis activities and capabilities.

How many hydrogen refueling stations does Sinopec have?

Relying on the advantages of more than 30,000 gas stations, Sinopec has accelerated the construction of a national hydrogen refueling station network, and completed building 24 new hydrogen refueling stations in the year, increasing the total number to 98 and the annual hydrogen refueling capacity to more than 1,700 tonnes.

What is China's strategy for the development of hydrogen energy industry?

ational strategy and a multitude of regional strategies. Since the release of China's Medium and Long-Term Strategy for the Development of the Hydrogen Energy Industry (2021-2035) (referred to as "the National Plan") in March 2022, there has been

The National Technical Standard Innovation Base (Hydrogen) Standard Verification Center is based on the China Hydrogen Alliance's "Hydrogen Pacesetter Action" and the ...

The company strives to build a "low-carbon energy ecosystem" featuring integrated development of fossil and clean energies. So far, CNPC has built 1,305 PV and storage stations, 718 ...

Data released by the Chinese Renewable Energy Society show that China has built over 400 hydrogen refueling stations, ranking first in the world in number.

At 15:07:26 on August 2, 2024, the Wynn Hydrogen Plant of the Phase I Project of the Ningdong Renewable Hydrogen Carbon Emission Reduction Demonstration Zone of the National Energy ...

The hydrogen mobility plan, with its goal of establishing a network of one hundred stations and ten thousand vehicles, and promoting hydrogen energy and fuel cell industry ...

China Petroleum & Chemical Corp recently launched the first public hydrogen refueling station in the Hong Kong Special Administrative Region, a milestone in the region's ...

The giant JPY500m (73.9m) National Hydrogen Power Quality Inspection and Testing Centre -- which covers an area of almost 13 hectares, ...

By 2030, the park aims to achieve a total investment scale of 10 billion yuan, attract 30 hydrogen energy enterprises, facilitate the listing of ...

out the vision for China's hydrogen industry by 2035. The National Plan strategically positions hydrogen as: (1) an important part of China's future energy system; (2) ...

The National Hydrogen Strategy aims to support low-carbon local industries, contribute to achieving climate neutrality and enhance the UAE's position as ...

BEIJING -- Chinese authorities on March 23 released a plan on the development of hydrogen energy for the 2021-2035 period as the country races toward its carbon peaking ...

This initiative marks a significant step forward in WEDZ's efforts to accelerate the construction of a national hydrogen energy industry ...

China Energy's Hydrogen Energy Company recently obtained the certification for the "National Technical Standard Innovation Base (Hydrogen) Standard Verification Center" at ...

As the market grows for hydrogen fuel cell electric vehicles, so does the need for a comprehensive hydrogen fueling infrastructure. Participating partners from the U.S. hydrogen ...

Relying on the advantages of more than 30,000 gas stations, Sinopec has accelerated the construction of a national hydrogen refueling station network, and completed building 24 new ...
