When is the Energy Storage Summit Central Eastern Europe?

The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present.

What are Europe's 'flexible buildings & resilient grids' & 'mission Solar'?

Complementing SolarPower Europe's flagship flexibility reports, like the annual 'EU Battery Energy Storage Systems Outlook', or Mission Solar 2040, the Association has published two further reports. 'Flexible Buildings, Resilient Grids' and 'Embracing the benefits of Hybrid PV systems' focus on distributed and utility flexibility respectively.

How is EU funding advancing energy storage solutions?

The Energy Storage Summit CEE in 2024 showed that several pilot projects are already in place, and EU funding is helping to push forward large-scale energy storage solutions. Poland, for example, is investing in lithium-ion battery technology, while Romania is exploring new pumped hydro opportunities.

What is battery storage Europe?

The Battery Storage Europe platform will highlight storage case studies and regulatory best practices across Europe and operate as SolarPower Europe's external arm of reinforced advocacy work on storage policy at the European-level. The launch of the new reports and the announced rebrand comes during the annual SolarPower Summit, held in Brussels.

Who is Solarpower Europe?

Walburga Hemetsberger, CEO of SolarPower Europe (she/her) said: "SolarPower Europe has represented the full European solar value chain for 40 years. From 50 MW of solar globally in 1985, to 350 GW alone in the EU last year, we are so proud to be powering the equivalent of 75 million EU households today.

Why is energy storage important in the CEE region?

However, one of the most pressing challenges for the CEE region remains the effective integration of renewable energy sources, such as wind and solar, into the existing grid. This is where energy storage solutions are becoming increasingly vital.

RE+ Eastern Europe is an engaging event focused on the region's growing solar and energy storage market, organized in partnership with EUPD Group and ...

Solar energy storage transformation in Eastern Europe

Based on in-depth research by EUPD Research, this short study sheds light on regional policy frameworks and market developments shaping solar energy adoption. With a ...

The solar photovoltaic (PV) sector in Europe is on the brink of transformative growth as we approach 2025. With an accelerating shift toward ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

SolarPower Europe's annual EU Market Outlook helps policy stakeholders in delivering solar PV's immense potential to meet the EU's 2030 renewable energy targets. Produced with the ...

The EU Market Outlook for Solar Power 2024-2028 is SolarPower Europe's comprehensive annual report that outlines the current status and forecasts the trajectory of the ...

A new era for solar energy is dawning in Eastern Europe: According to the European industry association SolarPower Europe, Poland and ...

Sponsor Details POLISH ENERGY STORAGE ASSOCIATION (PESA) PESA works for the development of the energy storage industry and energy transformation. It participates in ...

The Energy-Storage.news team brings you daily highlights and insights from the Energy Storage Summit EU in London, UK.

In Eastern Europe, too, large battery storage systems are becoming increasingly popular as a result of the expansion of renewable ...

Maintaining a varied approach for solar and storage projects in Eastern Europe, both in terms of the storage technologies being used and the ...

While the EU energy transition has advanced despite the recent energy crisis, several challenges remain. These include technological aspects such as electrification, grid ...

Italy, Germany, Spain, France and Ireland expected to be the leading EU countries for storage deployment between now and 2031 ...

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household ...

Discover the current state of energy storage companies in Europe, learn about buying and selling energy

Solar energy storage transformation in Eastern Europe

storage projects, and find financing options on PF Nexus.
